AR Goals

The client will... (from Functional Auditory Performance Indicators – FAPI)

- Respond to loud environmental sounds or noisemakers
- Respond to music
- Respond to speech
- Change vocalizations when amplification is on
- Notice own vocal productions
- Identify single words (body parts or common pictures) — Auditory Comprehension
- Discriminate non-linguistic information: loud vs. soft, continuous vs. abrupt, mom vs. dad voice

The client will...

- Tolerate amplification device
- Wear all waking hours

The clinician will...

- Check device before each session
- Complete Ling 10
- Monitor ME status
- Collaborate with audiologist
- Provide caregiver education
- Plot audiogram on Speech Banana

The client will... (from AVT Learning to Listen)

● Airplane	“aaaahhhh”	Imitation/Identification
● Baby sleeping	“ssshhh!”	
● Bear	“gggrrrrrr”	
● Bird	“tweet tweet”
